- Panel structure: smooth or Woodgrain without or with embossing
- Available with acrylic glazing (PVC or INOX frame)
- Gate frames/guides available in three colors - galvanized/zinc, black/black and black/white

D-GATE T

D-GATE T with tension spring is a solution that combines simplicity of design with high functionality and reliability. The tension spring, located vertically in the frame, ensures even distribution of forces, which enables the door to open and close smoothly, quietly and safely. This is an excellent choice for those looking for durable, safe and economical solutions for their garage.

D-GATE U

D-GATE U are characterized by a torsion spring mounted at the front in the lintel, thus ensuring reliability, durability and safety of use of the gate. Durable and robust construction allows the installation of panels weighing up to 250kg. The richness of colors and structures of the gate panels allows it to match any architectural style of the building.

D-GATE B

D-GATE B is a reliable sectional garage door with a rear torsion spring is a modern solution that combines functionality, safety and aesthetics. The use of a rear torsion spring in the construction of the door ensures its smooth and quiet opening and closing, which increases the comfort of everyday use. D-GATE B sectional garage doors are perfect for modern and classic construction.

ACCESSORIES FOR GATE AUTOMATION

Somfy

Came Home

Beninca

Sommer Base+

AVO

Keyboard

Smooove io

Universal radio receiver

Centrala TaHoma®

Operating with io technology, the wall-mounted keypad allows you to control two devices or groups of devices. The device runs on batteries and does not require power supply.

Wall-mounted transmitter operating with io technology. Battery-powered. Allows the gate to be remotely operated.

A universal radio receiver that works with TaHoma® Switch.

A control panel for managing multiple devices.

Signal lamp

Emergency battery power supply

Wall-mounted transmitter io

Photocells

Signal lights that indicate when the gate is opening and closing provide even greater safety for users.

The battery allows the drive to operate during a power outage 5-10 duty cycles per 24 hours.

Battery-powered radio io transmitter. Allows control of up to 3 devices or groups of them from a distance of up to 30 m.

The photocells create an invisible barrier using a beam of infrared light, and if this beam is interrupted, the photocells immediately stop the gate's movement in the closing direction.
